Used to create and edit technical drawings of architectural, mechanical, and civil engineering projects, AutoCAD is a de facto standard for architects and engineers. View on Autodesk Developer Network. AutoCAD is one of the most popular CAD software applications in use today. There are more than 15 million AutoCAD users worldwide, according to Autodesk, which makes AutoCAD the most used desktop CAD application on the market. CAD software users come from all fields: engineering, architecture, and construction, business, manufacturing, aerospace, landscape, and education. Features: The largest collection of drafting components of any CAD application (2.5 million); Paint and drawing tools; Makes it easy to add 2D and 3D components to drawings; Includes two-way intelligent linking between drawings and computer files; Uses traditional mouse and keyboard input, but also supports the new high-speed laser mouse and multiple simultaneous track pads; AutoCAD for Mac comes with all necessary drivers, applications and software preinstalled; The latest version of AutoCAD has a new GUI, a new engineering design environment and more; AutoCAD 2008 was the first version to support 3D modeling, improved object management, enhanced 2D tools, and multi-user features; It includes a powerful graphical user interface (GUI), a drawing workspace containing tools for all basic drafting tasks, commands for engineering design, and an array of standard parts and functions. The development of AutoCAD is a complex and large-scale project. Many thousands of people at Autodesk are involved in the design, testing, production, marketing, and promotion of AutoCAD and related products. Select the AutoCAD Overview topic for more details. Autodesk AutoCAD is available for the Windows platform, and AutoCAD for Mac is available for the Mac platform. It is the only AutoCAD product that will run on both Windows and Mac platforms. AutoCAD 2014 is available as a standalone product, as well as a complete package, which includes AutoCAD, AutoCAD LT, and DWG Plus. A new bisbenzimidazole, N-allyl bisbenzimidazole (ABI), was isolated from the ethanol extract of licorice (*Glycyrrhiza uralensis* Fisch.) and was found to exhibit antitumor activity in vitro. ABI inhibited the steroidogenic enzyme (11 beta-hydroxylase) activities of isolated zona fasciculata (R1) cells. It also inhibited the proliferation of these cells with an ED50 of 9.8 μmol/L. The inhibitory activity of ABI was higher than that of other synthetic analogs, Z-1 and Z-2. These results suggest that ABI may be an agent that can be used for the prevention and treatment of endocrine tumors. Chlorophyll and proteins in the elasmobranch *Chromis multilineata*: influence of the water temperature and the simultaneous diel cycle. The influence of water temperature on the biochemistry of the elasmobranch fish *Chromis multilineata* was investigated in relation to the daily variation of the photoperiod. On the 4th day of the experiment, blood and hepatopancreas were sampled between 10 a.m. and 12 p.m., and on the 8th day between 8 a.m. and 12 p.m. From the 12th day onwards, the sampling was made only between 8 a.m. and 12 p.m. At each time, a1d647c40b

Morton Hunsley (October 19, 1915 – May 16, 2001) was an American composer and music theorist. He was known for his studies of Stravinsky and his own musical compositions and for his books on musical theory, notably his book *On the General Characteristics of Music* (1956). He was born to former president and Tennessee senator Lamar Hunsley and Minnie Louise Hunsley in Chicago, Illinois. He received a Bachelor of Music degree from the University of Illinois in 1937. He taught at Indiana University (1937–1941), where he married Joan Daisey and began the Daisey Memorial Museum of Art. He received a Master of Music degree from Indiana in 1942. His studies in music theory and composition at the University of Chicago earned him a Ph.D. in 1944. He taught at the University of Michigan from 1944 to 1951. He joined the faculty of the University of Illinois in 1951 and in 1953, he moved his family to Urbana, Illinois. Hunsley retired from the University of Illinois in 1986. He taught music theory and composition at Indiana University from 1963 to 1984. He moved his family to La Grange, Illinois in 1987 and moved to Urbana again in 1990. He died in 2001 in Urbana at age 86.

Works Hunsley was the author of two books on music theory, *On the General Characteristics of Music* (1956) and *Music Aspects* (1965). He also published a book on musical analysis with Roger Fiske titled *Comparing Musical Structures* (1966). He had a unique teaching approach. Hunsley emphasized the importance of teaching the student how to think, not just how to practice. He was most proud of the class in which his own composition *Lamento* (1946) was performed. His music was published by many major music publishers, including Belwin-Mills, Crawford & Williams, and Ricordi. Some of his compositions have been recorded on albums including *Stravinsky: Music for Piano (Col Legno, 1982)* and *Morton Hunsley: Portrait in*
