System Requirements:

1.5 GHz Pentium 4, 1 GB RAM 1080x1920 resolution 30 FPS Developing a game isn't a simple job. A lot of testing has to be done before you can decide whether or not it's ready. You have to make sure that the game plays well on both high and low end systems, and that it looks great on as many screens as possible. In total, 3½ years have been spent designing and developing Project X Zone, and this is the first time it's been released on a home console.
