WASHINGTON — Seven years after sending a missile to destroy an aging North Korean missile site, the Pentagon will have to scramble to find a new mission for one of its most powerful weapons. A bill passed by Congress in August requires the Pentagon to remove all of the nuclear warheads from Minuteman III missiles in underground silos by September 2021. The missile sites' 140 silos house about 60 warheads. Before the Minuteman silos are refilled, the Air Force will conduct a weapons count to see how many warheads are available and how many will need to be taken out of storage for safekeeping. The 2017 nuclear posture review said the Pentagon would need to make a judgment about whether to retain warheads on the missile sites for deterrence, in the event the U.S. president wanted to use them, or destroy them because they were too old or too unreliable for nuclear strikes. The decision will be made by the Nuclear Posture Review Commission, which is scheduled to report to the Defense Secretary by the end of the year. While the Air Force is not worried about running out of Minuteman III warheads for deterrence, the weapons are vulnerable in a nuclear war and the Pentagon needs to figure out how many will be needed. "The question is: Does the U.S. have enough Minuteman III warheads available for deterrence?" said Air Force Secretary Heather Wilson, who oversees the missile corps. "If they have enough, then they can ca3bfb1094

6 Ways to Use Social Media to Grow Your Business By Alex Gallivan – May 23, 2016 Social media is a powerful tool for many businesses. From driving traffic to raising the brand awareness and overall customer satisfaction, it can provide a significant boost to your business. In fact, there are many ways you can use social media to grow your business, which will be discussed in this article. Take Advantage of Free Content As more companies rely on social media to increase traffic, create awareness and drive sales, they are offering free content on a regular basis. Whether it's a product review or video, these can be a great way to gain exposure for your company. Not only do you attract potential customers, but you also gain valuable advertising for your company and increased brand awareness. A good way to start is by joining a social media network where you can share content, such as photos, videos, or blog posts with a limited number of followers. As you gain followers, the more exposure your content will receive. Another option is to host an Instagram or Facebook contest where people can share photos of their favorite product or service. And lastly, you can offer a prize for the best photo and award it to the winner. Let Your Audience Know What's Coming Up Another way to use social media is to keep your audience in the loop. From offering a promo code to the latest news and updates, you can share your company's news with your audience regularly. For example, if you sell mouthwash, you could use social media to share when you're giving away a free bottle, or let people know that you'll be sharing recipes during the summer. Invite Your Customers You can also use social media to extend your customer service or product offering to your audience. For example, you could invite your followers to view a new product by holding a Facebook or Instagram contest. If your product is a subscription service, you could let your followers know when their subscription is about to expire.
